

Profile

I am a Full-Stack Developer based in Japan with good experience collaborating in teams and have worked on some independent projects. Over the past months, I have been working as a freelance React developer for Mamoru and developing personal side projects.

I am currently looking for a full-stack or back-end developer role in a small/medium company with in-house products. I am also looking for a potential freelance opportunity on full-stack development projects.

"I want to learn from the people I work with and collaborate to create a productive workspace."

Skills

FRONT-END

HTML5 | CSS3 | BOOTSTRAP | REACT | STIMULUSJS
